COURSE DESCRIPTION

Students develop essential aspects of critical thinking and apply those skills in evaluating international systems, environmental issues, and human rights questions. Not only will this course demonstrate the global dimensions of crucial contemporary issues, it will also develop the relational thinking that students will be expected to exercise in other academic contexts and throughout the rest of their personal and professional lives. In other words, this course is as much about how to study and think about global problems and relationships as it is a course about specific global issues.

COURSE STRUCTURE

In the framework of focusing on the self, the community, and the global world, UNIV 2002 is divided into three units: Sustainability, Human Rights, and Peace/Conflict. Each unit covers six themes: Money/Power, Gender/Identity, Space/Place, Differences/Similarities, Institutions/Networks, and Inclusion/Exclusion.

The focus on Sustainability is a mandatory unit. Your instructor may use the other two units or choose to focus on a specialized theme that addresses the same critical objectives and themes of the course above. Please see the Course Matrix document for detailed descriptions.

LEARNING OUTCOMES

UNIV 2002 supports student development to recognize the interdependence of the individual and the community in creating the challenges and opportunities in a global society through the examination of sustainability, human rights, and peace, and conflict. The following learning outcomes form the learning outcomes assessment. By the end of the course students will be able to:

1. Understand the inter-related social, environmental, and economic forces that create the environment for each individual.
2. Acknowledge the role of gender and its impact on the social and economic environment.
3. Demonstrate an understanding of the differences between economic and ecological sustainability in developing and developed countries.
4. Explain the role of institutions and networks in improving, inhibiting, or fostering sustainability.

All of the learning outcomes are predicated on the development of information literacy and effective use of technology by integrating the resources of campus libraries. Library staff are
always available for consultation and assistance.
